RECONNECTION TIME

Fronius International GmbH

hereby confirms that the Fronius inverters

/ Fronius Symo Hybrid 3.0-3-S – 5.0-3-S

are equipped with country specific setups for Denmark. Within the Profi-Menu of the inverters, it is possible to configure a grid monitoring time for reconnection of 180 s. The inverters will monitor the grid frequency and grid voltage and will only reconnect with the grid if voltage and frequency are within predefined limits for the defined grid monitoring time.
